To scan a LockTag you can choose from one of the following options:

Scan a QR barcode

Open the TimeDock app and select *clock-in mode*. Point the green scope at the LockTag QR code so that it's within the frame to scan it.

Scan a proximity card/tag with your NFC smartphone

Using an NFC enabled Android device, open the TimeDock app and select *clock-in mode*.

Tap and hold the back of the phone (depending on where the NFC reader is located) to the proximity card/tag to scan it.
