- A *TimeTablet* installed and configured.
- Smart-chipped ID cards. [Click here to find out how to purchase.](#)

Clocking In/Out

With the *TimeTablet* it's very simple. Just tap the employee's smart-chipped ID card to the left hand side of the device. The device will automatically start or stop work for that employee and display a message to confirm.

Note: In most cases the information is made available online through the TIMEDOCK web portal within a few seconds. In the case of an internet outage the device will wait and try again when the connection is up again.
