It is possible to assign a different TimeZone to an individual team leader or connected device for recording time outside of the main time zone setting (under *Account > Settings*).

To assign a new TimeZone to a *specific team leader or device* first log in to the web portal and navigate to *Manage > Devices*.

Click on the time-captcha device you wish to modify.

A screen with details specific to that device will display, including a drop-down box labelled "*Time Zone*". Select either "Use account setting" or choose from a list of available Time Zones to use for this device.

The image shows a screenshot of a web form. On the left, there is a label "Time Zone: ?". To its right is a dropdown menu. The dropdown menu is currently open, showing the selected option as "(UTC+12:00) Auckland, W". Above the dropdown menu, there is a button or link that says "Use Account Setting".

Once you've made your changes click the "*Save changes*" button at the bottom of the details form.
