Local phone:	(09) 444 1384

Note: Sometimes mobile GPS is too slow to respond in which case we regret that we must record the in/out with a null location. Generally speaking it's pretty consistent outdoors however indoors seems to struggle more frequently. [Click here](#) to read common causes for a missing GPS location.

With TIMEDOCK.com you can review GPS against any particular in/out entry, provided that GPS was available on the phone at the time and also that specific GPS settings have been turned on within TIMEDOCK. For more details on enabling GPS see [GPS overview](#).

1. Log on to your TIMEDOCK web portal secure.timedock.com.
2. View individual in/out transactions by navigating to *Home > View recent in/outs* or by clicking on the hours within a cell of the timesheet.
3. Click on any of the pointer icons within the **GPS** column on the right-hand-side.
