TimeDock allows you to generate secure URL links for anyone to view timesheets or clock in/out entries as **read-only**, and in real-time.

Timesheet share links are useful when you want to permit staff, contractors or other stakeholders to view timesheets without the ability to make any changes. If someone needs to only **view** timesheets or clock in/out details in real-time, generate share links rather than granting them admin user access to your TimeDock dashboard.

Sharing the timesheet screen

Follow the steps below to generate a **read-only** view of the timesheet screen.

Step 1: Log in to TimeDock and navigate to the timesheet screen.

Step 2: Apply any filters and/or display options you want to include e.g. show in/out.

Step 3: On the timesheet toolbar, click the 'link' button:

Step 4: Choose from the following settings:

Timesheet week:

a. **Static week**

Links to the currently selected week of the timesheet, regardless of the date accessed.

b. **Rolling week**

Links to the present-day week, regardless of the date accessed.

Weekly toggle:

a. **Do not allow weeks to be toggled**

Links only to the specific timesheet timeframe that was shared.

b. Allow weeks to be toggled

Lets the end-viewer navigate to any timesheet timeframe.

Step 5: Click 'Generate Link'.

Tip: Use a URL shortener such as <https://bit.ly> for user-friendly links.

Sharing a timesheet for an individual employee

You can share a read-only timesheet for an *individual employee* by first performing a search on the timesheet screen for the employee's unique payroll ID, enclosed with square brackets (e.g. [003]), then following steps 3 - 5 above.

Sharing in/out details for an individual employee

Follow the steps below to generate a *read-only* view of an employee's clock in/out details.

Step 1: Log in to TimeDock and navigate to the timesheet screen.

Step 2: Click on the total day hours for your selected employee to drill into the clock entries for that day.

PERSON	M	T	W	T	F
STEVE Conner	7.7 IN 07:12 OUT 14:54	8.1 IN 07:05 OUT 15:09	8.2 IN 06:59 OUT 15:11	8.1 IN 06:59 OUT 15:06	8.1 IN 07:10 OUT 15:15

Step 3: On the left-hand menu, click the 'Share Link' button.

Step 4: Choose from the following settings:

Static/current day:

c. Static day

Links to the currently selected timesheet day, regardless of the date accessed.

d. Rolling day

Links to the present day, regardless of the date accessed.

Daily toggle:

a. Do not allow days to be toggled

Links only to the specific timesheet day that was shared.

b. Allow days to be toggled

Lets the end-viewer navigate to any timesheet day.

Step 5: Click 'Generate Link'.

Tip: Use a URL shortener such as <https://bit.ly> for user-friendly links.
